

The ultra-portable **TASCAM iM2** is a must have for musicians who want to capture inspiration on their iPhone or iPad without sacrificing recording quality. A pair of condenser microphones – the same as our best-selling DR-series recorders – plugs into the dock connector of your Apple device. The microphones are adjustable over 180 degrees for the best sound placement. The iM2 contains its own microphone preamp and analog-to-digital converter for low noise and great audio quality. It's the perfect recording accessory for musicians of all skill levels available at an unbeatable price.

Features & Benefits

Feature	Benefit
Stereo condenser microphones	Ultra-sensitive microphones from our best-selling DR series recorders capture every detail
Microphones adjustable 180 degrees	Turn the mics front to back depending if you're holding the iPhone in your pocket, on a table, etc.
Adjustable gain control knob	Set the microphone level without even looking to prevent accidental distortion
Built-in A-to-D converter and microphone preamp	High-quality conversion and preamp provides low noise and less distortion
125dB SPL maximum level	Record the loudest concerts and instruments without overloading
Switchable limiter	Tame loud sounds to prevent distortion and sudden level jumps
Powered through iOS Dock connector	No battery to change or charge
USB power input	Charge the Apple device through a USB connector or optional PS-P515U for long recording sessions
44.1kHz/16bit recording	Records at the iOS maximum resolution for CD-quality audio
Compact size	Perfect for mobile use
Compatible with iPhone 4, iPhone 4S, iPad, iPad 2	Supports all of the latest Apple devices

Applications

- Live Recording – Record your own concerts from the front of the stage, or record a friends from your shirt pocket
- Songwriting – Use an app like TASCAM Portastudio to build up a song before presenting it to the band on your iPad
- Rehearsal Recording – Plug in a mic to capture band practice without overloading your iPhone
- Sound Effects Gathering – Record sounds in the outside world, then drop them into your productions or remixes

Also Available – Portastudio

TASCAM's **Portastudio** for iPad brings 30 years of easy-to-use home recording to your iPad. Based on the PORTA ONE recorder that revolutionized recording in 1984, the Portastudio app records up to four tracks with a vintage vibe.

Record using the built-in mic or the iM2, monitoring on authentic VU meters. A cassette transport with position counter tracks your position while you mix with level, pan and EQ controls. When you're ready to mix, the built-in mixdown function saves your song as a CD-quality WAV file. Your mix appears in iTunes when you're finished, ready to share with friends and bandmates.

A generation of your favorite bands crafted their songs with Portastudios, now it's your turn. Start capturing your songs with the company that invented home recording using Portastudio by TASCAM.

Portastudio is available on the app store:
